SF (Lux) Sicav 1 –BMI Protected Global Growth Fund (USD)

Investment objective

The BMI Protected Global Growth Fund (the "Fund" or "BMI Global") is an open-ended fund designed to provide investors with protected participation in the growth potential of global stock markets via a combination of actively managed funds and cash whilst limiting the downside risk.

The Fund is designed to ensure that the investment should be worth at least 80% of the highest NAV achieved at any point in time over the life of the Fund*. Therefore, in order to achieve these objectives the participation in the basket of UBS Global Asset Management equity & fixed income funds (the 'Equity Component') can vary between 0% and 100%:

- As the value of the Equity Component rises the Fund will increase its exposure to the Equity Component;
- As the value of the Equity Component falls the Fund will decrease its exposure to the Equity Component in favour of cash;
- The maximum exposure to the Equity Component will be 100%;
- In extremely adverse conditions the minimum exposure to the basket of funds could be zero and therefore returns will reflect prevailing interest rates.

The Equity Component

The Fund returns are provided from a managed basket of UBS Global Asset Management funds (the Equity Component) and cash.
